JAGANNADHAM SREE LAKSHMI

+91 9581838777 — sreelakshmijagannadham@gmail.com — LinkedIn — Vijayawada, Andhra Pradesh

Career Objective

Electronics and Communication Engineering undergraduate with a strong foundation in embedded systems, digital electronics, programming, and hardware-software integration. Experienced in developing academic projects using C, Python, Verilog HDL, Arduino, and computer vision. Seeking an entry-level engineering opportunity to apply technical and problem-solving skills to real-world engineering projects.

Education

VR Siddhartha Engineering College, Vijayawada — **2023 – 2027**
B.Tech in Electronics and Communication Engineering , JNTUK — CGPA: **7.61/10**

Sri Sarada Junior College, Moghalrajpuram — **2021 – 2023**
Intermediate – MPC , BIEAP — Percentage: **86.3%**

St. Ann's School, Ajit Singh Nagar, Vijayawada — **2021**
Class X (ICSE), CISCE — Percentage: **89.67%**

Technical Skills

- **Programming:** C, Embedded C, Python, MATLAB
- **HDL/VLSI:** Verilog HDL, VLSI, Cadence Virtuoso
- **Embedded Systems:** Arduino UNO, Arduino, Keil, Sensor Interfacing
- **Communication Protocols:** UART, I2C, SPI
- **Simulation & Development:** Wokwi, Tinkercad, Git, GitHub

Projects

- **High-Power Rocket Design and Simulation**
  OpenRocket — Rocketry — Flight Simulation
  Designed and simulated a single-stage rocket in OpenRocket, analyzing stability, flight performance, and recovery. Achieved a simulated apogee of 1011 m with a stability margin of 1.61 calibers and maximum velocity of Mach 0.786.
- **Automatic Fire Extinguisher**
  Designed and implemented an automatic fire extinguisher system using a BC547 transistor, IR receiver, and breadboard.
- **Automated Attendance System Using Deep Learning and YOLOv5**
  Python — YOLOv5 — OpenCV — Deep Learning
  Automated multi-face detection, recognition, and attendance logging from group images.
- **Smart Electronic Voting Machine**
  Arduino UNO — Embedded C — ILI9341 TFT — EEPROM — Wokwi
  Developed a secure voting system with password-protected reset, vote locking, and EEPROM-based vote storage. Implemented a TFT results dashboard with vote counts, percentages, bar graphs, and automatic winner detection.
- **2×2 Vedic Multiplier Using Verilog HDL**
  Verilog HDL — Xilinx Vivado
  Implemented a high-speed 2×2 Vedic multiplier using Verilog HDL and verified its functionality in Vivado.

Certifications

- IoT Assistant Certification – NIELIT
- Quantum Fundamentals and Advanced Algorithms
- Deep Learning – IIT Ropar, NPTEL (2025)
- Cloud Computing – IIT Kharagpur, NPTEL (2026)
- MATLAB Onramp – Signal Generation and Resampling, MathWorks

Internship

- **India Space Lab – Winter Intern** — **Feb 2026 – Mar 2026 — Online**
  Designed and simulated a high-power rocket using OpenRocket and performed stability and flight-performance analysis.
- **IoT Intern — TCOAP × Apirsquare Pvt. Ltd.** — **Jun 2026 – Jul 2026 — Offline**
  Designed and simulated IoT applications using ESP32, Arduino, and Wokwi. Applied Embedded C, microcontroller interfacing, and IoT concepts in virtual hardware environments.

Co-Curricular Activities

- IETE Member
- IEEE SPS Seasonal School – Signal Processing in Medical Imaging

Strong Subjects

Embedded Systems, Digital Electronics, Communication Systems

Languages

Telugu, English, German (Basic)
